**Problem B. Reverse Words**

This contest is open for practice. You can try every problem as many times as you like, though we won't keep track of which problems you solve. Read the [Quick-Start Guide](#) to get started.

Small input  
8 points

Solve B-small

Large input  
25 points

Solve B-large

**Problem**

Given a list of space separated words, reverse the order of the words. Each line of text contains  $L$  letters and  $W$  words. A line will only consist of letters and space characters. There will be exactly one space character between each pair of consecutive words.

**Input**

The first line of input gives the number of cases,  $N$ .  
 $N$  test cases follow. For each test case there will a line of letters and space characters indicating a list of space separated words. Spaces will not appear at the start or end of a line.

**Output**

For each test case, output one line containing "Case #x: " followed by the list of words in reverse order.

**Limits****Small dataset**

$N = 5$   
 $1 \leq L \leq 25$

**Large dataset**

$N = 100$   
 $1 \leq L \leq 1000$

**Sample**

Input	Output
3	Case #1: test a is this
this is a test	Case #2: foobar
foobar	Case #3: base your all
all your base
